# Annual Report of the Vital Statistics Branch

SIR,—I have the honour to submit herewith the Annual Report on the Vital Statistics of the Province of Alberta applicable to the year 1925. For the compilation of the tables and rates, the population has been estimated at 600,000, which is only an increase of 11,546 over the population of the census year 1921, the immigration during the past few years having offset the emigration.

The births of 15,014 living children were registered during the year 1925. This is an increase over the preceding year of 416, but is 764 less than the average of the five preceding years. The birth rate is 25.02 per 1,000 population, being .48 more than the year 1924. Although this birth rate is slightly lower than the average for Alberta, it is high when compared with other countries populated by the white race. The following are birth rates for the various countries for the year 1924:

Canada .....	23.4
England and Wales .....	18.8
Scotland .....	21.9
Germany .....	20.2
France .....	19.2
Norway .....	21.7
Sweden .....	18.1
New Zealand .....	21.6
Australia .....	23.2
U. S. A. ....	22.5

Of the 15,014 children that were registered, 7,666 were males and 7,348 were females, being a ratio of 1,042 males born to every 1,000 females, which is under the average proportion for male births. There were 367 plural births (twins and triplets), whilst the illegitimate births numbered 397. Of the total births, 6,168 occurred in cities and towns, 8,396 in rural districts and 450 on Indian reservations. The births registered in Edmonton numbered 1,945 and in Calgary 1,635.

Marriages registered during the year numbered 4,363, being 203 more than the number for the previous year; this is 101 less than the average of the five preceding years and constitutes a rate of 7.27 per 1,000 population; the marriage rate for Canada during the year 1924 was 7.1. There were 121 brides 16 years of age and under, whilst 1,109 brides were married between the ages of 17 and 19, and 1,795 between the ages of 20 and 24. Twenty brides and 40 grooms were over the age of 60, 8 of these grooms and 1 bride being over 70. The marriages in the cities were as follows: Edmonton 979, Calgary 910, Lethbridge 212, and Medicine Hat 117.

The divorces made absolute during the year numbered 101, this number being 18 less than in the previous year; 59 were granted to husbands and 42 to wives.

Deaths registered during the year, including Indians, numbered 4,717, those of males 2,712 and those of females 2,005. This number is 190 less than in the previous year, and constitutes a death rate of 7.86 per 1,000 population, being a decrease from the previous year of .44. The chief cause of death was disease of the heart, which accounted for 10.28 of the total deaths. There was a large decrease in deaths from contagious diseases, there being none from Smallpox, 62 from Diph-

# Annual Report of the Vital Statistics Branch

and—1. The purpose of this report is to present the results of the Vital Statistics Branch of the Government of Alberta for the year 1925. The report is divided into two parts: the first part contains the statistics of the year 1925, and the second part contains the statistics of the year 1924. The statistics of the year 1925 are presented in the following order: (1) Births, (2) Deaths, (3) Marriages, (4) Divorces, (5) Fertility, (6) Infant Mortality, (7) Life Expectancy, (8) Sex Ratio, (9) Race and Nationality, (10) Religion, (11) Education, (12) Occupation, (13) Income, (14) Expenditure, (15) Savings, (16) Insurance, (17) Unemployment, (18) Crime, (19) Public Health, (20) Social Services, (21) Housing, (22) Transportation, (23) Communication, (24) Recreation, (25) Miscellaneous.

The statistics of the year 1925 are presented in the following order: (1) Births, (2) Deaths, (3) Marriages, (4) Divorces, (5) Fertility, (6) Infant Mortality, (7) Life Expectancy, (8) Sex Ratio, (9) Race and Nationality, (10) Religion, (11) Education, (12) Occupation, (13) Income, (14) Expenditure, (15) Savings, (16) Insurance, (17) Unemployment, (18) Crime, (19) Public Health, (20) Social Services, (21) Housing, (22) Transportation, (23) Communication, (24) Recreation, (25) Miscellaneous.

The statistics of the year 1925 are presented in the following order: (1) Births, (2) Deaths, (3) Marriages, (4) Divorces, (5) Fertility, (6) Infant Mortality, (7) Life Expectancy, (8) Sex Ratio, (9) Race and Nationality, (10) Religion, (11) Education, (12) Occupation, (13) Income, (14) Expenditure, (15) Savings, (16) Insurance, (17) Unemployment, (18) Crime, (19) Public Health, (20) Social Services, (21) Housing, (22) Transportation, (23) Communication, (24) Recreation, (25) Miscellaneous.

theria as compared with 102 in the previous year and substantial decreases in Measles, Scarlet Fever and Whooping Cough. There was, however, a slight increase in Influenza.

The following tabular statement shows in order of frequency those causes of death which during or in the two previous years accounted for at least one per cent. of the total deaths. Both the actual numbers and the percentage of each is given together with the figures for the previous two years for purposes of comparison.

	1925		1924		1923	
	Number	Per cent. of Total.	Number	Per cent. of Total.	Number	Per cent. of Total.
Heart Disease .....	458	10.28	405	8.69	363	7.50
Malignant Tumors .....	340	7.63	348	7.47	293	6.05
Pneumonia .....	337	7.56	385	8.26	416	8.58
Violent Deaths .....	328	7.37	305	6.55	330	6.81
Fulmonary Tuberculosis .....	193	4.32	207	4.44	222	4.58
Diseases of the Arteries .....	179	4.02	157	3.37	108	2.23
Nephritis .....	177	3.98	166	3.56	163	3.37
Influenza .....	168	3.77	151	3.24	272	5.62
Diarrhoea and Enteritis .....	143	3.20	136	2.92	208	4.29
Appendicitis .....	111	2.49	136	2.92	125	2.58
Apoplexy .....	86	1.93	90	1.93	95	1.96
Diseases and Accidents of Pregnancy .....	84	1.88	88	1.90	92	1.93
Diphtheria .....	62	1.39	102	2.19	200	2.06
Suicide .....	62	1.39	53	1.14	69	1.42
Whooping Cough .....	43	.97	59	1.27	74	1.53
Scarlet Fever .....	39	.88	48	1.03	44	.91
Measles .....	12	.27	47	1.01	25	.52

The foregoing list comprises 2,822 deaths and amounts to 63 per cent. of the total deaths for the year.

The deaths of white children less than one year of age numbered 1,062, which is an infantile mortality rate of 72.90 per 1,000 births. This is a decrease from the previous year of 9.50, and is 15.94 less than the average of the five preceding years.

The following table gives for purposes of comparison the infantile mortality rate in the undernoted countries during the latest year for which statistics are available.

Canada .....	78.5	Scotland .....	90.6
Alberta .....	72.9	Austria .....	140.6
Nova Scotia .....	94.7	Belgium .....	88.9
New Brunswick .....	102.5	France .....	85.5
Ontario .....	75.8	Norway .....	61.0
Manitoba .....	75.9	Sweden .....	59.6
Saskatchewan .....	75.9	Australia .....	62.2
British Columbia .....	56.7	New Zealand .....	45.1
England .....	75.0	United States .....	71.9

There were 62 deaths by suicide and 8 by murder and manslaughter. Stillbirths numbered 451, an increase of 76 over the preceding year.

DONALD MACKIE,

*Deputy Registrar General.*

R. B. OWENS,

*Acting Deputy Minister of Health.*
